- Leaving Turkey

Since last year Gimnazija Metković has been participating in the Erasmus + Project “*What's the Use of It*” in order to acquire new knowledge and skills in the application of mathematics in real life . After Metkovic had hosted the first meeting of the school - partners from Cyprus , Romania, Spain and Turkey , there has followed two study tours with the project manager Ljiljana Jelacic and a few teachers to Cyprus and then to Turkey .

Teachers mobility facilitates the harmonization of teaching mathematics curricula , preparation of topics and tasks, which will be practised as extra-school activities and finally evaluated in the next school year .

The Mausoleum of Atatürk

In the school the transnational team was welcomed by the principal and then there was a Turkish presentation on their historical and cultural background. There was also a short and interesting school tour in order to get to know about their classes/labs, school equipment, students/teachers, the gym as well as the canteen.

The concert, which included a few pieces of classical music, also some Turkish traditional folk songs and finally a band who played some modern music, was an excellent mixture of musical styles and an outstanding experience.

Learning and entertainment

Memorable concert

Teachers and musicians

At the workshop IT teachers suggested arranging standards for Powerpoint presentations which should be used by all teams. The standard was supposed to include the colour, the size and shape of the text and the navigation structure of the presentation.

It was agreed that each topic in a presentation had one slide contents. The teachers managed to create a template presenting the design, structure and shape of slides.

Team work : The Spaniards

Team work: The Romanians

Team work: The Turks

Team work: The Romanians

The Conclusion:

Each team has to rearrange and redesign their presentations due to the new standards, so that all of them should look graphically identical.

Having seen the Evaluation Form created by the Spaniards everybody was asked to think and write a few additional ideas to contribute to all the requirements of the final evaluation papers.

The Conclusion:

Each team has to send the tasks to Spain after each Unit for the Evaluation Forms.
